

Over The Top (OTT) Outdoor Volleyball Net System

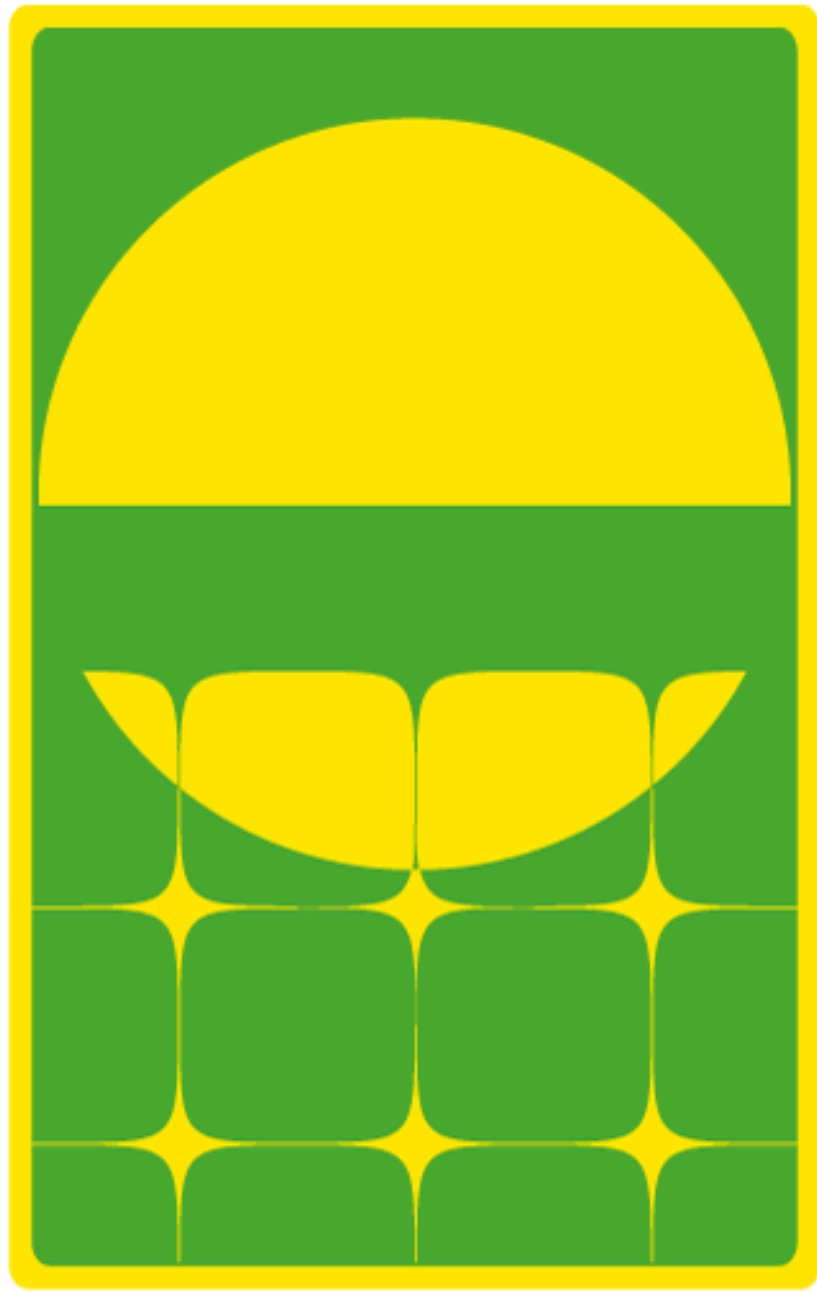

The OTT net system is designed for quick set-up, portability and solid performance. This competitive net system features telescopic aluminum standards, with a push button locking system for easy adjustments and a stretch bar with adjustable tension strap design for maximum play off the net. Total weight of the system in the carrying bag – 22 lbs distributed.

1. **POLES:** push-button telescopic, two-piece aluminum poles with three height adjustments. Men – 7'11-5/8", Women or Junior – 7'4-1/8", Coed – 7'8".
2. **TENSION STRAPS** – Loosen tension on all 4 straps so that there is a 4inch end left at the buckle.
3. **GUYLINES** – Attach the swivel clip to the top outside eyebolt. Holding the pole upright, extend the guylines out 45 degrees in both directions (approximately 8 – 10 feet apart) and anchor with metal ground stakes.
4. **NET TENSIONING** – Lean the base of the pole toward the inside center of the court approximately 18". Adjust the guyline tension by pulling down on the guyline tension ring or padded handle. Stand the pole upright. This procedure provides maximum net tension.
5. **TENSION STRAPS** – Tighten the straps by pulling the loose end of the strap away from the center of the court. When taking down the net loosen these straps first, then loosen the guylines.
6. **BOUNDARY** – Unwind the boundary cord onto the grass or beach playing area. The standard volleyball court dimensions are 30' x 60'. The boundary is pre-measured and has center pole markers and four corner anchors attached for easy setup. For ease of storage, a boundary hand winder is included with your set. Simply wind the boundary onto the hand winder.

Special Note: Periodic maintenance should be taken to prevent jamming or scratching of your poles. Disassemble the poles to clean all sand or dirt from the inside of each pole.

Specification:

- Adjustable 2" and 1-7/8" diameter telescopic Aluminum Poles.
- 3' x 32' competition net with 2" top and bottom binding.
- Aluminum stretch bar and adjustment nipples with 3 height settings. Tension straps.
- 2 - 1/2" thick guylines with ring or padded handle.
- 4 - 12" steel ground stakes with head.
- 1/4" thick boundary court.
- Boundary cord winder.
- Heavy duty black nylon carry bag.
